

For over thirty years, Dawnbreaker has been a recognized leader in the commercialization of advanced technologies funded by numerous government agencies. This woman-owned small business designs, executes and manages demanding, complex technology commercialization and technology transition programs that bring innovative technology solutions to the US economy and facilitates the creation of new jobs. Dawnbreaker is vertically integrated and provides end-to end services to assist Federal agencies and the organizations in which they invest tax-payer money in a wide range of services including: strategic and business planning, market research and specialized studies for mission and civilian applications, marketing communications, custom database and web-based tools, acquisition training, program management, as well as event planning and execution to showcase advanced technologies.

OUR STAFF

Dawnbreaker employs a staff with impressive technical, business, and government experience in medical, energy, environment, defense, and space applications. Our core staff of PhD's, EEs, and MBAs have held positions of authority in Fortune 500 companies, academia, and the Department of Defense and understand what it takes to bring innovative technologies to market. Complemented by our marketing communications department of talented web, print, and database designers and our market research department with talented writers with Master of Library Science [MLS] degrees, Dawnbreaker can offer Federal agencies a refreshing approach to long standing challenges.
